

TRAINER PRE SPORT MUSCLE CREAM

A SOFT-TOUCH AND FLUID GEL CREAM TO PREPARE MUSCLES AND LIGAMENTS FOR EXERCISE

RECOMMENDED FOR

ALL KINDS OF SPORT

- Athletes who find it hard to warm up muscles
- People who want immediate muscle response
- People who train in cold conditions
- People who do races with an explosive start

INFORMATION

The first part of exercise session is a very important moment in sport's activities. It is important to warm up properly to perform well and to prevent possible accidents. A heating massage may be a good preparation for muscles in sport activities and may assist in achieving the fixed goals.

FEATURES

Trainer is a soft-touch and fluid gel cream, useful to prepare muscles and ligaments to exercise. It can easily reach the deepest muscle's layers, producing an effective moderate and progressive heat. The DFC (Defence Factor Complex), with its pool of antioxidant factors, fights the formation of free radicals in muscles, delaying cramps and muscle aches, and combats exercise induced oxidative stress. Trainer is quickly absorbed, it does not leave any stains or oily residue and it is suitable for all seasons.

INDICATIONS

The product is useful to prepare muscles for physical activity. It generates a deep and progressive heating, able to warm up all the layers of muscle tissue. This gel cream is also useful to treat exercise induced aches in muscle.

HOW TO USE

Before sport activities, spread an appropriate amount of cream on the muscles involved, massaging until the product is fully absorbed.
